SAVING LIVES THROUGH NO MISSED ORGAN & TISSUE DONOR OPPORTUNITIES

The Kidney Foundation is committed to improving Alberta's organ donation and transplantation rates.

BECAUSE PEOPLE ARE NEEDLESSLY DYING

Today, Alberta's deceased organ donation rate lags behind other provinces, the Canadian average, and is well below other developed countries and jurisdictions.

WE MUST DO BETTER

YOUR FAMILY, FRIENDS, NEIGHBOURS, AND
THOSE IN THE TRANSPLANT COMMUNITY
NEED YOU TO STAND UP, GET LOUD, AND FIGHT
TO INCREASE ALBERTA'S
TRANSPLANT RATES

On behalf of the hundreds of Albertans waiting for an organ transplant or tissue donation, in honour of the thousands who have died in need of an organ transplant, and for the hundreds of thousands of Albertans who have selflessly registered as organ and tissue donors, we must ensure that every Albertan's decision to donate is honoured and respected.

MoreTransplants.ca

Bryn F. (far right) passed away too early. His family honoured his wishes, and Bryn became a tissue donor, saving a baby's life and improved the quality of life for many more people.

*I honestly can't imagine
why anyone would not want
to donate and I truly
hope that no family will live
a lifetime of regret at
withholding consent ... and
living with 'nothing'...*

- DONOR FAMILY

OUR GOALS

- Saving lives through no missed organ & tissue donor opportunities.
- For Albertans' wishes to donate their organs & tissue to be respected and honoured.
- For Alberta to become a leader in deceased organ & tissue donation and transplantation.

WHO ARE WE FIGHTING FOR?

486

And Counting

*CORR Data,

4TH

**MOST EXPENSIVE TREATMENT
IS FOR CHRONIC KIDNEY FAILURE (AHS, 2017)**

COVID IMPACT HAS ONLY INTENSIFIED THE NEED.

EARLY RESEARCH INDICATES THAT LONGER TERM ORGAN DAMAGE IS EMERGING AS AN EFFECT OF THIS DEVASTATING PANDEMIC.

ALBERTA CAN BE A LEADER

Minister LaGrange, it is within your authority as the Minister of Health to ensure Albertans have improved access to world-class health care when and where they need it. Within OTDT, I request you implement the following:

- **Funding:** Aligned with the Alberta Organization Group's (AOG) analysis, a commitment of new money, \$25 – 30 million, over the next ten years to support policy and operational change required after the passing of Bill 205.
- **Leadership:** An integrated pan-provincial system that integrates HOPE and SAODTP with a transparent, full-time, accountable, senior executive champion and leader.

Why Go Public?

Solving Alberta's organ and tissue donation & transplantation crisis requires government leadership and government-led policy solutions.

Because...

- Transplantation is the most clinically effective treatment for organ failure.
- Transplantation is the most cost-effective treatment for organ failure.

The Path

PRIORITIES ACHIEVED

Through continuous work among many stakeholders, patients, families, and donors, we achieved the following steps in 2021-23

✓ Legislation Amendment (replace Mandatory Consideration with Mandatory Referral) and implementation of provisions of the Human Tissue & Organ Donation Amendment Act.

✓ Establish specifically trained Donation Teams (specialized in donor identification, donor referral and donor management)

✓ Implement continuous and Real-Time Audits, as an essential best practice in urban and large rural centres

✓ Ensure a user-friendly donor registration system

Potential Deceased Donors as a Proportion of Total Annual Deaths

Presumed Consent & Registries

- Advocates of presumed consent tend to count all members of the general population as potential donors. However, this is misleading because few individuals will ever be in the situation of being considered for organ donation upon their death (~1-2%).
- Proponents of donor registries (databases containing the names of individuals who wish to donate their organs after death) also suggest databases better reflect the donor pool.
- As with the general population, this is not strictly true, because the number of individuals who ultimately become available as possible donors (“potential donors”) is a small fraction of those who may be interested in becoming a donor (“intended donors”).
- That said, online registries and registering as an organ donor IS a great way to start the conversation with your family and friends.

A WORD OF CAUTION

- Albertans who are 18+ can register as an organ donor via the online Organ and Tissue Donation Registry, at a registry office, or by signing the back of their healthcare card.
- However, we know not everyone is asked about their intentions to donate at registries, despite legislation mandating this.
- There isn’t enough public education. Often, individuals are first introduced to the conversation at this point of contact and quite frankly, this doesn’t allow individuals to make an informed decision.
- **Registering your intentions to Alberta's online registry does not ensure your wishes are being honoured.**
- Even if you have followed those steps, organ donation will only proceed if consent is received from the family. If there is disagreement among the family, donation will not proceed.
- **In other words, REGISTERING YOUR WISHES IS NOT ENOUGH!!**

Note: Both presumed consent and online registries can be useful tools to compliment organ donation and transplant policy only AFTER Alberta's procurement system has implemented the above policy changes.

How to Support the **Patient** Movement

In the Photo: Logan Boulet

On April 7, 2018, Humboldt Broncos defenceman Logan Boulet succumbed to his injuries. His family honoured his wishes and donated his organs so that six lives could live on.

START **THE** CONVERSATION

Talking about organ & tissue donation can be difficult, but with the right tools, you can start the conversation.

1. Learn about the organ & tissue donation process. Visit [MoreTransplants.ca](https://www.moretransplants.ca) & contact your local Kidney Foundation office for additional information.
2. Make a decision that works best for you. Share your wishes about what you want to happen at the end of your life with your loved ones. Discuss why you've made the decision.
3. Be **LOUD** and **PROUD**! Let everyone know you've registered as an organ & tissue donor and why you made this lifesaving choice.
3. Talk to your family and friends about organ & tissue donation. Challenge them to do the same.

How to Support the **Patient** Movement

SHARE **YOUR** STORY

Why do you care about organ & tissue donation, and transplantation? You can help save lives and fight for change by sharing your story.

1. Share your story on social media. You can post a photo or video to show Albertans the faces of organ & tissue donation.
2. Inspire people to take action (join the campaign, register to be a donor, re-share your story).
3. Tag us & use #KidneyFoundationNABT #MoreTransplants #NoMissedDonorOpportunities when you post online.
4. Tag the Premier of Alberta, the Minister of Health, the Leader of the Official Opposition, and your MLA in your post!
5. Contact us at Info.NABT@Kidney.ca so we can share your story on our social media channels and MoreTransplants.ca

Whether you or a loved one is on a transplant wait list, you are a living organ donor, or are a registered organ or tissue donor, your voice matters.

How to Support the **Patient** Movement

CONTACT **YOUR** MLA

You will not be met with resistance. Both Government and Opposition Members have a **strong history of believing in organ & tissue donation** and supporting changes to improve Alberta's organ & tissue donation system.

1. Contact your MLA and ask for a meeting. Share why you believe in organ & tissue donation, share your story, and ask your MLA to urge the government to implement policy changes.
2. Write a letter to your MLA! Pre-written constituency letters are located at MoreTransplants.ca. Download, personalize, sign, mail (or email) your letter.
4. Use social media to engage your MLA. Visit MoreTransplants.ca for resources and contact us at Info@MoreTransplants.ca for further support.
5. Always tag the Premier, the Minister of Health, the Leader of the Official Opposition, and Your email on all social media posts.

organ and tissue donation and transplantation (OTDT). I am calling upon the government to continue its leadership and invest in establishing an OTDT system that unequivocally prioritizes organ and tissue donation, ultimately improving the lives of those waiting on transplant lists.

Alberta Government has the opportunity to become this leader in OTDT and directly improve the lives of thousands waiting for a transplant and a life-altering tissue donation, honour all who have died waiting for a transplant, and recognize hundreds of thousands of Albertans registered as organ donors.

Minister LaGrange, it is within your authority as the Minister of Health to ensure Albertans have improved access to world-class health care when and where they need it. Within OTDT, I request you implement the following:

1. **Funding:** Aligned with the Alberta Organization Group's (AOG) analysis, a commitment of new money, \$25 – 30 million, over the next ten years to support policy and operational change required after the passing of Bill 205.
2. **Leadership:** An integrated pan-provincial system that integrates HOPE and SAODTP with a transparent, full-time, accountable, senior executive champion and leader.

Alberta's deceased donation rates have been lower compared to that in other higher performing provinces over the past fifteen years or more (British Columbia, Ontario, Quebec, and Nova Scotia). Rates have increased recently; however, this is partly due to the devastating result of the opioid crisis. Other provinces have invested in a single integrated provincial agency responsible for the effective administration and coordination of organ and tissue donation and transplantation services. It is time and the opportunity for Alberta to be transformational.

Under our existing system, Alberta cannot modernize effectively due to its fragmented dual structure (North and South). This means that every day, thousands of Albertans are needlessly suffering, and many die. This is unacceptable. Minister LaGrange, these steps are needed to embrace innovative, sustainable, comprehensive, and lifesaving change to Alberta's organ & tissue donation system.

Organ donation is the ultimate gift of life, but more is needed to ensure no missed donor opportunities. Why? Because one donor can save the lives of up to eight people and improve the quality of life of another 75. Our current system has failed too many. I am calling upon the government to establish an OTDT system that unequivocally prioritizes organ and tissue donation, ultimately improving the lives of those waiting on transplant lists.

Again, this can be achieved by investing \$25 - 30 million. At a time when fiscal responsibility is imperative, the new Alberta deceased donation program will be self-funding after six years (\$15 million), and the remaining funds will be used for continuous improvement and demand. This investment will improve the lives of up to 2700 patients and save Alberta Health and Alberta Health Services up to \$400 million over ten years.

It is time to commit new money, \$25-\$30 million, over the next ten years to modernize a fragmented system and ensure Albertans are not needlessly dying. I urge you to include this funding in the 2024-2025 budget or earlier.

WHY CANADA NEEDS MORE ORGAN DONORS

74% OF CANADIANS WAITING FOR AN ORGAN TRANSPLANT ARE WAITING FOR A KIDNEY.

THE MEDIAN WAIT TIME FOR A KIDNEY TRANSPLANT FROM A DECEASED DONOR IS OVER

28% OF ADULT KIDNEY TRANSPLANTS ARE MADE POSSIBLE BY LIVING DONORS

51% OF ALL ADULT LIVING KIDNEY DONORS ARE NOT A BLOOD RELATIVE OF THE RECIPIENT.

THE KIDNEY PAIRED DONATION PROGRAM HAS MADE

1,000

TRANSPLANTS POSSIBLE SINCE 2008.²

YOU CAN BE A PART OF THE SOLUTION.

Consider living organ donation.

Join the Kidney Paired Donation Program Registry. Learn more: kidney.ca/Organ-Donor-Programs

Register your intention to donate your organs through your provincial donor registry. Find out more: kidney.ca/Register

Speak to your family and loved ones to make sure they know and honour your wishes.

LEARN MORE ABOUT KIDNEY HEALTH AND ORGAN DONATION AT [KIDNEY.CA](https://kidney.ca)

Important Note: The COVID-19 pandemic has placed unprecedented burdens on Canadian healthcare systems in 2020. Priorities were reassessed and resources reassigned, resulting in an unfortunate decrease in the number of kidney transplants performed.

*Excludes Quebec
